DETAILED ACTION***Allowable Subject Matter***

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the inclusion of the compound of structural formula I, and the reaction product comprising said compound. Structural formula I is distinguished over the prior art because it comprises (meth) acrylic containing alkylene oxide residue, such as a 1,2-epoxy (meth) acrylate, within it's structure. While the prior art teaches (meth) acrylic silanes, the prior art fails to teach (meth) acrylic silanes having structural formula I. In addition, it is well known in the prior art to prepare moisture and radiation curable polyurethanes, the prior art teaches, for instance, reacting organic polyisocyanates with (meth) acrylic polyols and amine-substituted alkoxysilanes—see 5,426,132 to Gaglani. Or the prior art teaches reacting reactive organosiloxanes with vinyl or acrylic functional isocyanate compounds—see 5,384,340 to Hara et al. The closest prior art for the reaction product is 5,696,179 to Chawla, which teaches a silane oligomer having both radiation-curable groups and moisture curable groups, however said oligomer is prepared by reacting a polyisocyanate, a compound providing a reactive terminus, such as (meth) acrylate, and oligomer diol, and a silane compound. The instantly claimed invention is distinguished over the prior art, therefore the methods and products comprising the compound of structural formula I, and the reaction product comprising said compound are, also, deemed distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
